Claims 1 – 7, 29 - 34 are rejected under 35 USC Sec. 102(b) over Hater for the reasons given at pages 3 – 4 of the previous Office action. In claim 1, “[a]llowing” the microbial population to propagate is tantamount to “not preventing” the microbial population to propagate. Hater does not takes steps to prevent propagation of the microbes on the biosupport itself, so Hater describes “allowing” them to propagate on the support. Furthermore, Hater expressly describes “additives 13 . . . which function to stimulate the growth of the bacteria . . . within the sock” (col 1 line 66 – col 2 line 3). Stimulation of growth is the same thing as stimulation of propagation.

Claim 8 is rejected under 35 USC Sec. 103(a) over Hater, as set forth above, further in view of Armstrong, for the reasons given at page 4 of the previous Office action.

Applicant's argument have been considered, but are not persuasive. The argument that “said microbial cultures propagate on the surface of the carrier substrate” is not commensurate in scope with the new claim limitation, i.e., the “allowing to propagate” limitation.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
